### MESSAGE

Thanks for your communication dated 5<sup>th</sup> inst. I am happy to learn that the variety and expanse of the services rendered by Sanjivani Health and Relief Committee under your leadership. Your services are laudable especially because they try to reach the interior villages in Ahmedabad and Kheda districts where no proper healthcare facilities are available. I have had an opportunity to attend the launching of mobile Medical-Dental-Optometry Van in April last year and also learn little more about the patient care rendered through the Sanjivani initiative. I am further happy to learn that a first of its kind ophthalmic van is being launched by your organization in September 2009 with facilities like computer assisted number refractometer, tonometer for glaucoma detection, slit lamp and fundus examination for retinal diseases detection, by qualified Ophthalmic Surgeons and Ophthalmic Assistants along with the basic medical treatment and facility for diabetes detection and treatment through a specialised van. I am confident that with the commitment to the social service shown by your team and the support and confidence expressed by the donors, the activities under your banner will continue to grow in the wider interest of the society. I wish your mission a great success.

Gandhinagar  
August 12, 2009

Jay Narayan Vyās
